

Formulary, Chlorinated Formulations

Viscous Vertical Surface Chlorinated Cleaner

CHLOR-11

DeMOX CSG-30 ECO provides viscosity control, detergency, and wetting to this gelled chlorinated cleaner. **DeMOX CSG-30ECO** is readily biodegradable.

<u>Ingredient</u>	<u>% by Weight</u>	<u>Function</u>
1. DI water	40.0	Diluent
2. DeMOX CSG-30 ECO	15.0	Viscosity Control, Detergency, Wetting
3. NaOH (50%)	5.0	pH Control, viscosity control
4. Sodium Hypochlorite (12.5%)	40.0	Oxidizer

Procedure

Combine the first two ingredients and blend to form a clear viscous liquid. Carefully add the NaOH mixing thoroughly. Then add sodium hypochlorite and blend to form a viscous chlorinated gel. Addition of NaOH (50%) above the amount specified will raise the viscosity of the system.

Usage Level

Use 'as-is' where cleaning vertical surfaces is desired.

Product Properties

Appearance: Clear yellow gel
pH (as-is): >12
