

2021 GREEN INITIATIVE

DeForest offers a variety of readily biodegradable products with low aquatic toxicity. The products below are well-suited for use in environmentally safer products.

DeTERIC LP & DeTERIC CP-Na-38: High foaming amphoteric; excellent detergency, wetting, & foam stability in the presence of oil & grease. Both are excellent hydrotropes & 1,4-dioxane-free.

DeTAINE PB: High foaming, alcohol-free cetyl betaine producing dense, creamy foam. Does not contain 1,4-dioxane residuals. An excellent choice for personal care applications.

DeTERGE NAS: Low-to-moderate foaming, anionic surfactant offering detergency, wetting, & hydrotroping properties. Stable in caustic, sodium hypochlorite, & hydrogen peroxide. Does not contain 1,4-dioxane.

DeMOX CSG-30 ECO: Thickener for sodium hypochlorite or hydrogen peroxide. High foaming & free of 1,4-dioxane.

DeCORE AFCI-45: Amine-free corrosion inhibitor for cast iron, steel, aluminum & yellow metals. Does not contain nitrites, azoles, phosphorous, or boron, or 1,4-dioxane residuals.

DeTROPE SA-45: Chlorine stable hydrotrope offering very low, fast breaking foam. Also has wetting properties and does not contain 1,4-dioxane.

DeMULS KE-75: Emulsifier for dibasic esters, kerosene, & other solvents.

DeMULS SGE-95: Emulsifier for soy, canola, & vegetable esters.

While the iguana enjoys the sunshine outside our Florida lab window, we are inside, focused on developing new and innovative readily biodegradable products!
