

## DeMULS KE-75

**DeMULS KE-75** is a readily biodegradable, anionic/nonionic emulsifier for dibasic esters, kerosene and other solvents.

### SPECIFICATIONS

Appearance @ 25°C:	Clear, pale yellow liquid
% Solids:	75% min.
pH (5% in DI Water):	6.0 +/- 1.5
Color (Gardner):	3 max.

**SOLUBILITY** DeMULS KE-75 is dispersible or soluble in water, alcohols, aliphatic, aromatic and chlorinated solvents and glycols. It is dispersible or insoluble in oils.

### TYPICAL PROPERTIES

Density @ 25°C ~1.1 g/ml

- Emulsifier and wetting agent
- Solubilizer and dispersing agent
- Detergency
- Approved for use as inert in non-food pesticide formulations
- Moderate to high foam
- Readily biodegradable
- Non-phenolic

### APPLICATIONS

- Kerosene emulsions
- All-purpose cleaners & degreasers
- Solvent based paint strippers
- Environmentally safe cleaners
- Mild acid or alkaline cleaners
- Liquid laundry detergent
- Graffiti removers
- Dibasic ester emulsion cleaners
