

DeMULS SGE-95

DeMULS SGE-95 is a cost effective, nonionic/anionic, biodegradable emulsifier for soy, canola and rapeseed methyl esters.

SPECIFICATIONS

Appearance @ 25°C:	Clear amber liquid
% Activity:	95% min.
pH (1% in DI Water):	8.0 – 10.0
Color* (Gardner):	10 max.

*Darkens upon aging

SOLUBILITY DeMULS SGE-95 is soluble in water, alcohols, aromatic and chlorinated solvents. It is dispersible in glycols and oils. It is insoluble in aliphatic solvents below a concentration of 25% by weight.

TYPICAL PROPERTIES

Density @ 25°C ~1.0 g/ml

- Emulsifier for methyl esters
- Very good wetting
- Provides lubricity
- Stable in mild alkaline cleaners
- Biodegradable
- Non-Phenolic

APPLICATIONS

- Micro-emulsion cleaners
- Carpet & laundry spot removers
- Low VOC formulations
- All purpose hard surface cleaners
- Graffiti removers
- Degreasers
