

DePHOTROPE CAS-MF

DePHOTROPE CAS-MF is a 50% active, organic phosphated amphoteric. It is recommended for use in alkaline and acid systems as a hydrotrope, detergent and wetting agent.

SPECIFICATIONS

Appearance @ 25°C:	Clear yellow to amber liquid
Color (Gardner):	10 max.
% Activity:	54 +/- 2.0%
pH (10% in DI water):	6.0 – 8.0

SOLUBILITY DePHOTROPE CAS-MF is soluble in water, alcohols and glycols. It is insoluble oils and solvents.

TYPICAL PROPERTIES

Density @ 25°C ~1.1 g/ml

- Excellent hydrotrope for nonionics in alkaline & acids systems
- Detergency
- Wetting
- Lubricant
- Moderate foam
- Corrosion inhibition
- Good rinsing properties
- Degreaser
- Hard water stability

APPLICATIONS

- Low to moderate foaming alkaline and acid cleaners
- Heavy duty alkaline cleaners
- Burnishing compounds
- Oven cleaner
- Toilet bowl cleaners
- Water based lubricants
- Metal cleaners
- Synthetic cutting fluids
- Fiber and textile lubricant
