

DePHOTROPE LFW-98

DePHOTROPE LFW-98 is an anionic, low foaming, phosphate ester with excellent wetting, hydrotrope and detergency properties.

SPECIFICATIONS

Appearance @ 25°C:	Clear yellow liquid
pH (10% in DI water):	<2.5
Color* (Gardner):	8 max.
Acid Value #1 (at pH 5.0 -5.5):	160 – 180
Acid Value #2 (at pH 9.0 -9.5):	290 – 320

**darkens upon aging*

SOLUBILITY DePHOTROPE LFW-98 is soluble in water, alcohols and glycols. It is insoluble or dispersible in oils and solvents.

TYPICAL PROPERTIES

% Activity	98% min.
Density @ 25°C	~1.2 g/ml

- Low foaming
- Excellent wetting properties
- Hydrotrope for nonionics
- Lubricity
- Excellent alkali & alkaline electrolyte stability
- Detergency

APPLICATIONS

- Alkaline cleaners
- Mild acid cleaners
- Synthetic cutting fluids
- Hard surface cleaners
- Water based lubricants
- Low foam, all purpose cleaners
